

Please do not implement any proposal that would lessen Indiana's Telephone Privacy law protections. Being on Indiana's "do not call" list has really helped decrease the number of telemarketing calls that I receive. Time at home is much more enjoyable without the frequent telemarketing calls I used to get. Even though I screen my calls using Caller-ID, I used to get many "out-of-area" calls and "private" calls every day. They were telemarketers who just kept calling and never left a message. Now because of Indiana's Telephone Privacy law, I get almost no telemarketing calls. It's wonderful. Please don't do anything to dilute Indiana's Telephone Privacy law.
